

INTERFAITH SUSTAINABLE TRAVEL TO WORSHIP

Honor the environment and **be part of the solution** by joining the Interfaith Sustainable Travel to Worship (ISTW) celebration in the Spring. Since burning a gallon of gasoline can put 25 pounds of CO² and other greenhouse gases into the atmosphere (U.S. EPA), ISTW encourages people to travel to worship via an environmentally-friendly mode such as ride sharing, biking, walking, or using transit.

ITSW is a friendly competition among houses of faith in Wisconsin for the highest proportion of trips to worship that use such a sustainable travel mode during a day in May. Leading congregations receive a small plaque that can be displayed proudly.

Is your faith group participating? You can download material and find more information at www.madison.com/communities/faith/pages/May1.php. To register contact Susan De Vos at atwfus@tds.net.
